

Journal selection criteria and Indexing benefits in Embase and Scopus

Sara Jalalzadeh¹

Abstract

Growth and development of scientific productions is a major reason for journal indexing in scientific databases. One of the main benefits of journal indexing in scientific databases is the increase of article visibility and user access. All scientific databases including Scopus and Embase use specific criteria to select journals for indexing and among the many journals applying to be indexed, some of them are indexed in the databases. This study reviews the journal selection criteria and benefits of indexing in Embase and Scopus.

Keywords: Indexing, Journals, Embase, Scopus, Medical Journalism
